

seca 764

Digital weighing and measuring station

- Scale with integrated digital measuring rod.
- Determination of weight, height and BMI in one single process.
- Extremely high capacity of 250 kg and low-level platform.

seca 764:

Weight, height and BMI – quickly determined in just one step.

For diagnosing the nutritional condition of a patient, the ratio of weight to height is evaluated. Ideal for determining this data quickly and simply is the seca 764 – both the weight and height of the patient can be measured electronically. Due to its manifold properties, the seca 764 is especially suitable for demanding use not only in general and internal medicine but also in diabetology, endocrinology and nephrology.

Comfortable determination of all relevant data in just one process.

The combination of scale and measuring rod makes it possible to determine the nutritional condition in just one time-saving step. At the touch of a button, the seca 764 determines the Body Mass Index (BMI) on the basis of the height and weight of the patient.

Extra high capacity and low-level platform.

With a capacity of 250 kg and a robust, cast-iron base, the seca 764 is also ideal for heavyweight patients. An additional benefit is the large but low-level platform. The ribbed rubber mat gives the patient a secure footing.

Mobile with transport castors.

In spite of its sturdy construction, the digital weighing and measuring station is mobile: integrated castors make transport easy. Its adjustable levelling feet ensure that the scale stands securely even if the surface should be uneven.

The headpiece on the height measuring rod is especially large to ensure correct positioning of the head. Precise measurements are guaranteed.

Height can be measured digitally with the integrated measuring rod.

The scales' low height enables even heavy weights to step effortlessly onto the platform.

Technical Data

Column Scales:

- Capacity: 250 kg
- Graduation: 100 g
- Dimensions (WxHxD): 360 x 1,320 x 686 mm
- Platform (WxHxD): 350 x 84 x 360 mm
- Weight: 20 kg
- Power supply: mains adapter
- Functions: TARE, HOLD, auto-BMI
- Optional: RS232 interface seca 460
- Approval class: III

Integrated Measuring rod:

- Measuring range: 110–200 cm
- Graduation: 1 mm
