Don't have a business account? Sign up

1. Open a browser (e.g., Chrome) on a device and open the following website:
   https://eu.secacloud.com/guest/login?accountType=analytics125

2. Log in with your access data or create your own tenant using the "Register" button.

Hello, Andreas!

Add your first device to start the body composition measurement.

Add device

3. After logging in for the first time, this start page will appear if no device has been added yet.
   Click on "Add device."

Add device   ×

3. If you already have a device in your cloud, you can add more devices. To do this, open the menu in the top left corner and select "Devices."

4. To add your device, click "Add New Device" in the upper right corner.

5. Please enter all mandatory information marked with an asterisk (*) in the following form and then click on "Add." The serial number of your device can be found on the type plate at the bottom left of the platform. You will have received the registration key in advance by email.

6. The device will now be automatically added to your personal database (tenant). A certificate will be installed in the background. The device will then be ready for use.
