

EMR-validated measuring station for height and weight

seca
Precision for health

seca 285

- + Measuring and weighing in one step with absolute precision
- + Precise 50 g graduation at a very high capacity of up to 300 kg
- + Precise head alignment by the seca Frankfurt Line Positioner
- + Wide range of height measurement: also suitable for pediatrics
- + Three-line touchscreen for simultaneous weight, height and BMI display
- + High-quality glass platform with a heel positioner for exact three-point measurement
- + Display in the headpiece shows the height
- + EMR-validated: transmit measured data directly to an electronic medical record system or printer

seca 285

EMR-validated measuring station for height and weight

Weighing and measuring in a single step

With the seca 285, height and weight are determined in a few simple steps and – if you wish – sent directly to the digital patient file (EMR) or to a PC. The combination of measuring and weighing in a measuring station saves working time and is more convenient. In addition, the BMI can be calculated automatically. With the high-quality headpiece, the seca Frankfurt line and the fine graduation of the scale, the measuring stations always deliver absolutely precise results.

Approval class	III
Capacity	300 kg
Graduation	50 g < 150 kg > 100 g
Dimensions (WxHxD)	434 × 2,394 × 466 mm / 17.1 × 94.25 × 18.3 in
Platform (WxHxD)	430 × 60 × 365 mm / 16.9 × 2.4 × 14.4 in
Net weight	16 kg / 35.3 lbs
Power supply	Batteries for headpiece, Power adapter
Functions	Pre-TARE, HOLD, Auto-HOLD, CLEAR, Auto-CLEAR, RESET, Automatic weighing range switch-over, Calibration / automatic calibration, Adjustable damping, Auto-BMI, Mother+child function, BFR (Body-Fat-Rate), User-defined zero setting, SEND/Auto-SEND
Interfaces	Wi-Fi / Ethernet optional with seca 452
Accessories	+ Interface module seca 452

Medical Device Regulation (MDR) certified

Height measurement

Measuring range	30 – 220 cm
Graduation	1 mm

Large measuring and weighing range with maximum accuracy

The seca 285 has a very large measuring and weighing range, which makes it suitable for children and adults alike and is also characterized by high accuracy. The next point that illustrates the high quality of the measuring station is the processing and equipment: An illuminated main display, a height display on the headpiece and a sturdy glass platform with a heel positioner. The seca Frankfurt Line Positioner offers precise head alignment.

seca integration solutions: How to significantly improve workflows.

EMR-validation means that the seca 285 can be integrated into the hospital information system via the network. In this way, measured data can be sent directly to the digital patient file (EMR) at the touch of a button, where they are immediately available to all users. An additional USB barcode scanner is also used to document who measured whom and when (patient and user identification). This saves you time, increases process reliability and eliminates transmission errors.
