

seca 656

Wireless electronic platform scale with innovative memory function

EMR-integrated

- Especially spacious platform for all common roll-in systems.
- Stable construction with very high capacity.
- Transportable due to castors and integrated handles.
- Innovative memory function for determining precise weight of patient.

seca 656:

Precision weighing in all situations.

Emergency admission to hospital – everything has to happen very quickly. Especially when an operation is necessary and the patient's weight must be determined in order to ensure the correct dose of anaesthetic. The weighing of patients on stretchers or gurneys in this or in less dramatic situations is no problem with the seca 656: the platform is large enough for all common gurneys or stretchers on undercarriages. And, of course, patients can also be weighed comfortably on a chair or in a wheelchair with this platform scale. The seca 656 is thus suitable for use in the dialysis sector and in old people's and nursing homes.

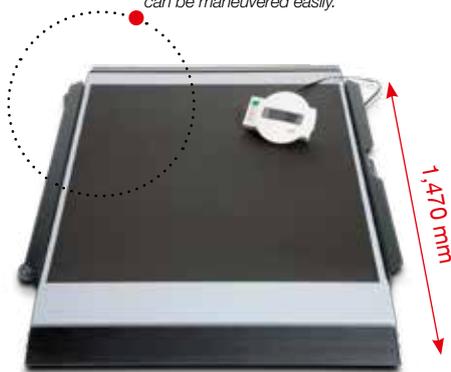

Stable construction with very high capacity.

Thanks to its extremely stable construction and very high capacity of 360 kg, even heavyweight patients can be weighed easily with the platform scale 656. The platform is generously sized to cope with wheelchairs and all common roll-in systems and stretchers on undercarriages.

Castors and integrated handles for transport.

The seca 656 is a very versatile scale as it is easy to move around on its smooth-running castors with the aid of the integrated handles.

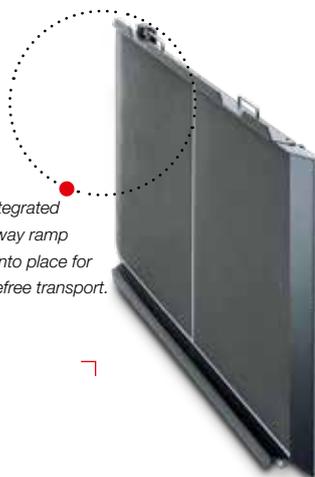

With its transport castors and steering castor, the seca 656 can be maneuvered easily.

Cable remote display with many additional functions.

Included in delivery is the cable remote display with easy to read LCD figures. It can be mounted on a table or hung on a wall at eye level. The display can be operated intuitively and is equipped with many intelligent functions: Thanks to the HOLD function, the patient can first be attended to before the result is noted. The innovative memory function of the seca 656 is particularly practical – for example in the casualty department before an operation: the total weight of the patient including stretcher or wheelchair is first determined. After again weighing the stretcher or wheelchair the net weight of the patient appears automatically. With the pre-TARE function, the additional weight of auxiliary aids can also be deducted from the total weight while actually weighing the patient. And, finally, the individual nutritional condition of the patient can be ascertained with the aid of the BMI function.

The integrated fold-away ramp locks into place for troublefree transport.

Paperless and error-free wireless transmission of measurements.

With the seca 360° wireless technology, the seca 656 can transmit measurements to the optional seca 360° wireless digital printer. With the network-capable software solutions seca analytics 115 or seca emr flash 101 and wireless USB adapter seca 456, your PC can receive and analyze measurements and forward them to an Electronic Medical Record (EMR) system. The seca 656 is EMR-integrated, ready to handle digital patient records and all the demands the future will bring. For more information about EMR integration, visit: www.seca.com.

seca 656

Technical Data

- Capacity: 360 kg / 800 lbs
- Graduation: 50 g / 0.1 lbs
- TARE-range: 360 kg / 800 lbs
- Dimensions (WxHxD): 893 x 87 x 1,655 mm / 35.2 x 3.4 x 65.2"
- Dimensions / platform (WxHxD): 800 x 55 x 1,465 mm / 31.5 x 2.2 x 57.7"
- Weight: 46.2 kg / 101.9 lbs
- Power supply: Power adapter
- Functions: TARE, pre-TARE, HOLD, auto-HOLD, BMI, kg/lbs switch-over, damping, SEND/PRINT
- Optional: Stand for cable remote displays seca 472
- System compatible with: 360° wireless printer advanced seca 466, 360° wireless printer seca 465, 360° wireless USB adapter seca 456, software seca analytics 115 and seca emr flash 101, stadiometer seca 274 or seca 264
