

seca 763

Digital weighing and measuring station with automatic BMI calculation

- Scale with integrated digital measuring rod.
- Determines weight, height and BMI in one single process.
- Large and clear LCD figures for easy-to-read results.
- High capacity of 550 lbs.
- Low-level platform with slip resistant base and anti-tip column design.

seca 763:

Innovation for health.

With the seca 763, clinicians can quickly and simply obtain the height and weight ratio that is needed to determine a patient's Body Mass Index (BMI) value. In addition to determining the patient's weight, the scale is equipped with an integrated, digital measuring rod. With these special features, the seca 763 is suitable for users in the demanding general and internal medical sectors, especially those in the diabetology and endocrinology field.

Comfortable determination of all relevant data in just one process.

The combination of the digital scale and digital measuring rod makes it possible to determine the nutritional condition in just one time-saving step. At the touch of a button, the seca 763 determines the Body Mass Index (BMI) value on the basis of the height and weight. This value is a reliable indication if a patient is abnormally overweight or underweight. This station is also equipped with TARE and HOLD functions. In addition to these functions, the operation of the scale is easy and intuitively graspable.

High capacity and low-level platform.

With a capacity of 550 lbs and a robust, cast-iron base, the seca 763 is ideal for weighing heavyweight persons. A further advantage here is that the platform is not only large but also low. The ribbed rubber mat ensures that the patient has a safe footing, as well as a slip resistant base and anti-tip column design. The weight is shown in 0.1 lbs steps so that even the smallest of fluctuations in weight can be determined.

Mobile with transport castors.

In spite of its sturdy construction, the digital weighing and measuring station is mobile, with its integrated castors making transportation easy. Its adjustable leveling feet ensure that the scale stands securely even if the surface should be uneven.

The seca 460 interface establishes a connection between the scale and PC or printer, making it easy to analyze and record measurements.

The scale's low height, slip resistant base and anti-tip column design makes measuring and weighing a safe procedure.

The headpiece on the height measuring rod is especially large to ensure correct positioning of the head. Precise measurements are guaranteed.

Technical data

Column scales:

- Capacity: 550 lbs / 250 kg
- Graduation: 0.1 lbs / 50 g
- Dimensions (WxHxD): 14.2 x 84.6 x 27.2" / 360 x 2,150 x 690 mm
- Platform (WxHxD): 13.2 x 3.1 x 13.6" / 335 x 80 x 345 mm
- Weight: 36.8 lbs / 16.7 kg
- Power supply: power adapter
- Functions: TARE, auto-HOLD, auto-BMI, lbs/kg/sts switch-over, inch/cm switch-over
- Optional: RS232 interface seca 460
- Slip resistant base and anti-tip column design

Integrated measuring rod:

- Measuring range: 43–79" / 110–200 cm
- Graduation: 0.05" / 1 mm
